---

**Results-driven Flutter Developer** with **3+ years** of experience delivering **cross-platform apps** across **Android, iOS, and Windows**. Proficient in **Dart**, with strong command over **BLoC, GetX, and Clean Architecture** following **SOLID principles**. Experienced across the full **SDLC**—**requirements, architecture, development, testing, deployment, and maintenance**. Skilled in **RESTful APIs, WebSocket, Firebase**, and **performance optimization** with a focus on **clean, testable, and scalable code**.

---

## SKILLS

- **Core Technologies:** Flutter, Dart, BLoC, GetX, GetIt,
- **Architecture Patterns:** Clean Architecture, MVVM, SOLID, OOP, Modularization
- **Backend & APIs:** REST API, Socket.io, Frappe ERP, Firebase (Auth/Firestore/Messaging)
- **Development Tools:** Git, VSCode, Xcode, Postman, Android Studio, Wireshark, Cursor
- **Best Practices:** Agile, Scrum, Localization, Debugging, Optimization
- **Integrations:** ZKTeco Biometric, Native Serial Port (Platform Channels), Payment Gateways

## EDUCATION

**Lahore Garrison University**  
**(2019-2023) (CGPA 3.43)**  
BS, Computer Science

---

## PROFESSIONAL EXPERIENCE

### LucrumX

**Flutter Developer** - (Full-time, On-site) **(December 2023 – Present)**

- **Developed 12+** end-to-end **apps** for **sales, logistics, and HR**, used by **5000+ users**.
- Architected using **BLoC, GetX & Clean Architecture**, cutting code redundancy by 60%.
- Integrated with **Frappe ERP** (REST/WebSocket), **ZKTeco**, and **serial hardware**.
- Improved **real-time data** sync by 35% via optimized **socket** communication.

#### Key Products (Built Solo):

- **Sales & POS:** Lucrum Sales, Lucrum Bridal Store
- **Food Ops:** Lucrum Order Taking, Lucrum KDS, Lucrum Delivery, Lucrum Rider
- **Factory & Logistics:** Lucrum Scanner, Lucrum WeighBridge
- **HR Tools:** Lucrum Employee App, Lucrum Access Control

### SavvyEats – Qatar (Remote)

**Flutter Developer** - (Full-time, Remote) **(August 2025 - Oct 2025)**

- Delivered two production apps for meal subscriptions and delivery operations.
- Implemented Clean Architecture with BLoC and GetIt, ensuring stable performance and offline-first reliability.
- Optimized API, caching, and background processes for seamless user and rider workflows.

Key Apps:

- **SavvyEats User:** Subscription management, meal selection, payments, and tracking.
- **SavvyEats Rider:** Delivery workflow, navigation, background location, and offline sync.

## Zajel, Qatar

**Flutter Developer** - (Part-time, Remote)

**(December 2024- May 2025)**

- Delivered key features for two cross-platform apps targeting healthcare consultants.
- Migrated legacy code to Clean Architecture + BLoC + GetIt.
- Improved performance and reduced crash rates through state and dependency refactor.
- Enhanced appointment flow and booking experience for thousands of users.

Key Apps:

- **Shorasha Consultant:** Tools for managing appointments, schedules, and clients.
- **Shorasha User:** End-user app for searching and booking consultants.

## ProgSoft Tech

**Flutter Developer** - (Full-time, On-site)

**(January 2023- November 2023)**

- Transitioned from intern to full-time developer delivering small-to-mid scale mobile apps.
- Used Flutter + GetX for state management, UI handling, and API integration.
- Collaborated in Agile sprints, delivering responsive UI, improved performance, and clean code.
- Gained deep experience in refactoring UI, API handling, and codebase optimization.
